Notice No. below

US Army Corps of Engineers, Pittsburgh District
1000 Liberty Avenue
Pittsburgh, PA 15222-4186

Application No. 200501172

Date: February 7, 2006

Notice No. 06-6

Closing Date: February 27, 2006

1. TO ALL WHOM IT MAY CONCERN: The following application has been submitted for a Department of the Army Permit under the provisions of Section 404 of the Clean Water Act (33 U.S.C. 1344).

2. APPLICANT: BPB West Virginia Inc.
5301 West Cypress Street, Suite 300
Tampa, FL 33607-1766

AGENT:

GAI Consultants, Inc.
Pittsburgh Office
385 East Waterfront Drive
Homestead PA 15120-5005

3. LOCATION: in wetlands adjacent to Fish Creek and an unnamed tributary, in Marshall County, West Virginia.

4. PURPOSE AND DESCRIPTION OF WORK: The applicant is proposing to develop a new, high speed gypsum board plant in Marshall County, approximately seven miles south of Moundsville. The project site is roughly bounded to the north by Fish Creek Road, to the east and south by Fish Creek and to the west by West Virginia Route 2. The site is approximately 122 acres, of which approximately 90+ acres will be developed for the plant. The construction includes the installation of the site infrastructure including roadways, sanitary sewers, and utilities. The site contains 15.72 acres of jurisdictional wetlands and 0.09 acre of non-jurisdictional (isolated) wetlands. Approximately 0.52 acre of jurisdictional wetlands (0.03 acre of palustrine emergent and 0.49 acre of palustrine open water) would be impacted by the project along with 215 feet of an ephemeral stream. Wetland mitigation will consist of the preservation of 4.33 acres of jurisdictional wetlands on-site through conservation easements. A drawing of the proposed project is attached to this notice.

5. WEST VIRGINIA CERTIFICATION: This permit decision will not be made until the State of West Virginia, Division of Environmental Protection (WVDEP), issues, denies, or waives State

Certification. This public notice does not serve as application to the WVDEP for certification required by Section 401 of the Clean Water Act. The applicant must apply directly to the WVDEP for individual water quality certification. The WVDEP will also consider whether or not the proposed activity will comply with sections 301, 302, 303, 306, 307 of the Clean Water Act or any other appropriate State laws. Any person wishing to comment, provide information, and/or request a public hearing concerning certification for this project should write to the:

West Virginia Department of Environmental Protection
Division of Water & Waste Management
401 Certification Program
601 57th Street SE
Charleston, West Virginia 25304
Telephone: 304-926-0495

Re: Public Notice CELRP-OP-F No. 06-6

6. IMPACT ON NATURAL RESOURCES: The District Engineer has consulted the most recently available information and has determined that the project is not likely to affect the continued existence of any endangered species or threatened species, or result in the destruction or adverse modification of habitat of such species which has been determined to be critical. Mist net surveys were conducted in May 2005. No federally listed bats were captured. This Public Notice serves as a request to the U. S. Fish and Wildlife Service for any additional information they may have on whether any listed or proposed to be listed endangered or threatened species may be present in the area which would be affected by the activity, pursuant to Section 7(c) of the Endangered Species Act of 1972 (as amended).

7. IMPACT ON CULTURAL RESOURCES: The National Register of Historic Places has been consulted, and it has been determined that there are no properties currently listed on the register which would be directly affected by the proposed work. A Phase II National Register Evaluation was conducted and the West Virginia Division of Culture & History has determined the project will have no effect to any archaeological resource that is eligible for or include in the National Register. If we are made aware, as a result of comments received in response to this notice, or by other means, of specific archeological, scientific, prehistorical, or historical sites or structures which might be affected by the proposed work, the District Engineer will immediately take the appropriate action necessary pursuant to the National Historic Preservation Act of 1966 - Public Law 89-665 as amended (including Public Law 96-515).

8. PUBLIC INVOLVEMENT: Any person may request, in writing, within the comment period specified in the paragraph below entitled "RESPONSES," that a public hearing be held to consider

this application. The requests for public hearing shall state, with particularity, the reasons for holding a public hearing.

9. EVALUATION: Interested parties are invited to state any objections they may have to the proposed work. The decision whether to issue a permit will be based on an evaluation of the probable impact including cumulative impacts of the proposed activity on the public interest. That decision will reflect the national concern for both protection and utilization of important resources. The benefit which reasonably may be expected to accrue from the proposals must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the proposal will be considered including the cumulative effects thereof; among those are conservation, economics, aesthetics, general environmental concerns, wetlands, historic properties, fish and wildlife values, flood hazards, flood plain values, land use, navigation, shoreline erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs, considerations of property ownership and, in general, the needs and welfare of the people. The Corps of Engineers is soliciting comments from the public; Federal, state, and local agencies and officials; Indian Tribes; and other interested parties in order to consider and evaluate the impacts of this proposed activity. Any comments received will be considered by the Corps of Engineers to determine whether to issue, modify, condition or deny a permit for this proposal. To make this decision, comments are used to assess impacts on endangered species, historic properties, water quality, general environmental effects, and the other public interest factors listed above. Comments are used in the preparation of an Environmental Assessment and/or an Environmental Impact Statement pursuant to the National Environmental Policy Act. Comments are also used to determine the overall public interest of the proposed activity. The evaluation of the impact of the activity on the public interest will include application of the guidelines promulgated by the Administrator, Environmental Protection Agency, under the authority of Section 404(b) of the Clean Water Act (40 CFR Part 230).

10. RESPONSES: A permit will be granted unless its issuance is found to be contrary to the public interest. Written statements concerning the proposed activity should be received in this office on or before the closing date of this Public Notice in order to become a part of the record and to be considered in the final determination. Any objections which are received during this period may be forwarded to the applicant for possible resolution before the determination is made whether to issue or deny the requested DA Permit. All responses to this notice

CELRP-OP-F
Public Notice No. 06-6

should be directed to the Regulatory Branch, attn Nancy Mullen, at the above address, by telephoning (412) 395-7170, or by e-mail at Nancy.J.Mullen@lrp02.usace.army.mil. Please refer to CELRP-OP-F 200501172 in all responses.
